

REAQTA NGAV +

REAQTA-EON

Hardened Against All Threats

SOLVING THE AV SECURITY GAP

Cyber-attacks have grown both in number and in sophistication over the years. This has made detection and remediation an increasingly complex task for security analysts.

Without next-generation prevention and attack visibility capabilities, traditional security softwares like Anti-Virus are essentially ineffective and unreliable. As we speak, many organizations without the essential next-generation security software are suffering from business disruptions and financial losses.

ReaQta-EON was designed with the latest breakthrough technologies in artificial intelligence and machine learning to provide the key and essential security that every organization needs to fight modern-day threats. Your organization can now effortlessly strengthen your operational resilience and defense from unwanted cyber-disruptions.

WHY SECURITY TEAMS CHOOSE REAQTA-EON

Simplicity in usage, elegance in delivery. ReaQta's NGAV+ embodies the concept of "round-the-clock" defenses in all scenarios, even when teams are working remotely or offline.

"Identifying attacks before they gain entry allows ReaQta to administer resilience during a sudden breach."

Frost & Sullivan

Trusted by analysts globally. An integral part of the "Multisandbox" project.

VirusTotal

"Brilliant endpoint protection with the convenience of easily isolating and tackling the problem from its comprehensive and easy-to-use interface."

Telco Provider

"We now have better visibility on our endpoints and are able to detect threats missed by antivirus and raises our organization security posture significantly."

Financial Institution

UNPARALLED PROTECTION TECHNOLOGY

ReaQta-EON combines both traditional and modern defense techniques with the latest AI/ML strategies to stop attackers in real-time. This system protects you from both known and unknown threats, thus reducing the need for expensive response and recovery costs and efforts.

FAST & EASY MANAGEMENT

With ReaQta-EON's autonomous protective agent and optimised UI/UX, analysts require minimal management and can respond easily to threats. Accessible via any web browser from any location at any given time, the cloud dashboard can be easily managed on-the-fly.

CLOUD-DELIVERED NGAV +

EON agents are cloud-delivered and fully operational within seconds. As a user, this means rapid deployment with major cost-savings. Teams are saved from significant infrastructural and maintenance costs, as ReaQta provisions and manages the server and Hive Brain™ software on behalf of the user.

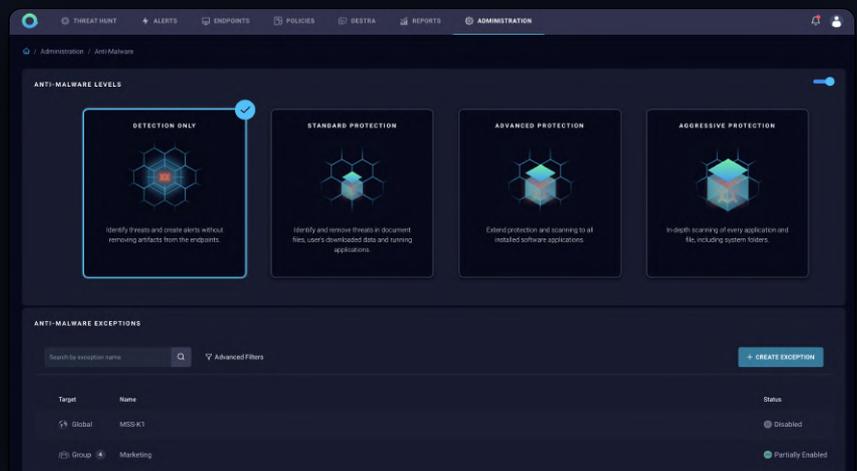

Note: Installation can be done easily via Group Policy (GPO), System Center Configuration Manager (SCCM) or Manually

SECURITY THAT SCALES

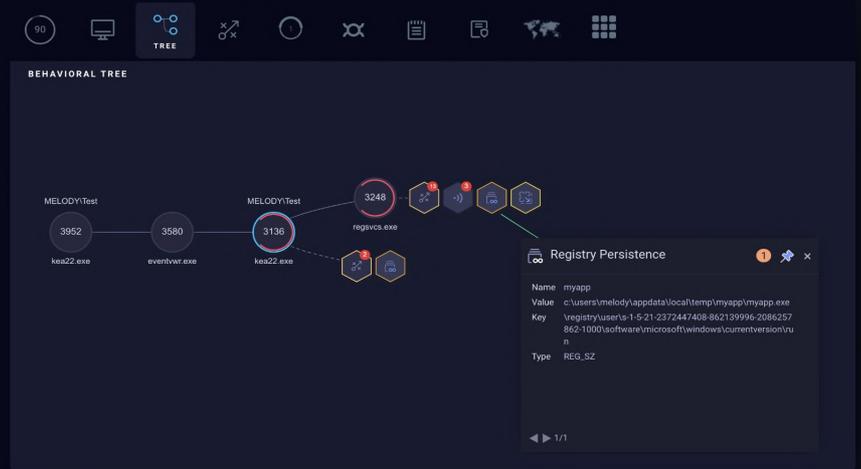

With ReaQta, your protection scales with your business. As security needs grow, you will be able to seamlessly layer-on advance capabilities and analysis such as Threat Hunting, Threat Cloud, Artifact Analysis, Clean-up Automation, Detection Strategies and API Access. Companies looking for continuous monitoring can choose to opt for 24/7 Managed Services by ReaQta's security team with ReaQta-MDR.

4 Easily Configurable Anti-Malware Modes

WHAT MAKES REAQTA-EON SUPERIOR?

ReaQta-EON combines proven techniques with highly advanced detection, pre-execution and prevention technologies to safeguard your organization's key data and information assets.

Key Features	How ReaQta-EON Delivers
PRE-EXECUTION PREVENTION	Employs dynamic emulation and attack sequencing technology to detect malicious code within files in the pre-execution phase. The source code of the file is reviewed numerous times within milliseconds prior to full execution, effectively stopping potential malicious files from running.
NANO OS™ & DUAL AI ENGINES	Each endpoint agent is complete with ReaQta's dual AI engines and Nano OS™ technology, which grants extended proprietary detection and autonomous operation capabilities, even when devices are offline. Our AI technology deeply understands and baselines the infrastructure to detect advanced and zero-day threats.
FULL ATTACK VISIBILITY	With ReaQta's AI engines, you can completely detect and correlate complex alert information into an easily comprehensible storyline in real-time, without any manual intervention.
MALWARE QUARANTINE	ReaQta-EON quarantines unwanted malware to allow for further investigation and retrieval, unlike traditional protection which automatically deletes such files, including false positives.
ANTI-RANSOMWARE	ReaQta-EON utilises behavioral analysis to extend protection capabilities to stop zero-day threats and ransomware attacks. By analysing file behaviours according to the cyber-kill chain, ReaQta-EON understands when an attack is imminent and stops the malicious processes right from the execution.
SIGNATURE & HEURISTIC MATCHING	Designed to continuously stop known attackers in their tracks via proven security techniques of heuristics and signature-based prevention.

ABOUT REAQTA

ReaQta was founded by an elite team of offensive and defensive cybersecurity experts and AI/ML researchers. Combining these backgrounds, the team has designed an AI Endpoint Security Platform that leverages on Artificial Intelligence, data mining and a unique NanoOS to protect endpoints from advanced malware attacks and data exfiltration.

This novel approach applies the latest technologies to automate, optimise and simplify the process of detecting and handling new threats. Organisations can now eliminate the most advanced threats in the fastest way possible with an elegant, powerful and easy-to-use platform - entirely without the need for additional skilled personnel.

Security teams can now do more, with less.

Andere tools die uw organisatie weerbaarder maken

ProteQtor IT Security is niet alleen reseller partner van ReaQta, maar biedt nog meer cybersecurity tools aan om uw organisatie zo weerbaar mogelijk te maken.

Hieronder tools die wellicht interessant zijn ter bescherming van uw organisatie:

- » Beveilig uw e-mail met [Proofpoint email security](#)
- » Train uw medewerkers met laagdrempelige [Wizer security awareness trainingen](#)
- » Bescherm het inloggen met [Watchguard Authpoint multi-factor authenticatie](#)
- » Voorkom bezoeken aan ongewenste websites met [NSOC360 Safeweb webfiltering](#)
- » Krijg inzicht in de veiligheid van uw netwerk met [Guardian360 scans](#)
- » Herstel verloren data met [NSOC360 Safedata online backup](#)

Samen uw organisatie weerbaarder maken

Laat hackers uw bedrijfscontinuïteit niet in gevaar brengen!

Cyberaanvallen bedreigen privacy, bedrijfskritische data, de reputatie en andere 'kroonjuwelen' die cruciaal zijn voor de continuïteit van uw organisatie. De vraag is allang niet meer 'of' uw organisatie aangevallen wordt, maar 'wanneer' uw organisatie (weer) aangevallen wordt. Het is essentieel om cyberaanvallen te voorkomen en de gevolgen van cyberaanvallen tot een minimum te beperken. Het feit dat u deze pdf leest, toont dat u dat belang inziet.

Vanwege de grootte, de complexiteit en de diversiteit van moderne cyberaanvallen is een multidisciplinaire aanpak nodig. We helpen u graag met praktische adviezen en effectieve oplossingen om deze aanpak te realiseren.

Met de juiste trainingen, [tools](#) en support helpen wij u hackers het hoofd te bieden en er voor te zorgen dat alles wat voor uw organisatie van waarde is, beschermd blijft.
