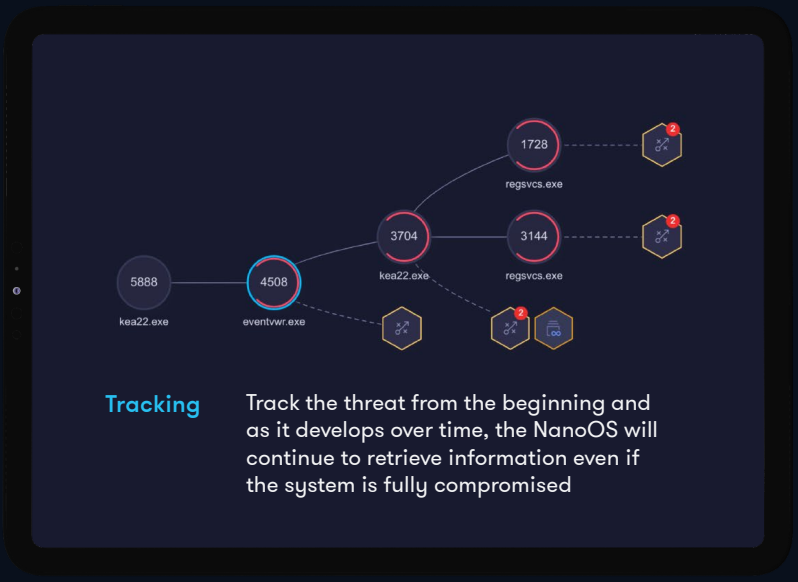
STAY AHEAD OF ATTACKERS

With complete visibility, advanced detection and threat hunting



Tracking Track the threat from the beginning and as it develops over time, the NanoOS will continue to retrieve information even if the system is fully compromised

Complete Visibility from Endpoint to Infrastructure

ReaQta-Hive monitors endpoints from outside the OS using the **world's first NanoOS**. The platform offers full visibility over the infrastructure, allowing real-time queries to endpoints.

Compliance Ready

ReaQta-Hive helps auditors identify gaps in compliance by scanning and analysing endpoints. With real-time information on non-compliant endpoints, auditors can quickly remediate compliance issues as soon as they come up.

Advanced Threat Detection with a Dual A.I. Engine

ReaQta-Hive's dual A.I engines work in concert to provide multiple points of detection. The first engine runs at the endpoint level, looking for malicious activity targeting a specific device. The second engine runs at the infrastructural level, looking for suspicious activity across the infrastructure.

MITRE ATT&CK™ Integration & Real-Time Hunting

ReaQta-Hive offers real-time search of the infrastructure for presence of specific Indicators of Compromise (IOC), binaries and behaviors. The platform comes with a complete mapping of **MITRE™ Tactics & Techniques**, as well as **120+ searchable parameters.**

Protection Beyond Legacy Solutions and Automated Threat Alerts

ReaQta-Hive's continuous learning A.I allows for detection of new techniques and previously **unknown threats**, that would escape detection from legacy and signature based solutions. An early-warning system automatically identifies emerging threats, allowing security teams to perform a full security assessment before a breach happens.

Rapid Incident Response and Ease-of-Use

ReaQta-Hive's interface enables analysts to respond to threats in under a minute. The UI directs analysts to the highest priority events, while the A.I. automatically reconstructs the incident, assessing its scope and impact on the infrastructure. The analysis workflow is simple and does not require additional security resources.

REAQTA-HIVE ADVANTAGE:

1.	NanoOS is resilient and invisible to attackers
2.	Early detection of new and unknown threats, including ransomware
3.	Minimum impact to endpoint performance
4.	Highly customizable solution
5.	Remote remediation of threats
6.	Open APIs for easy integration with existing security stack

REAQTA: CREATED TO COMPLEMENT YOUR OPERATIONS

Ease of Use

• Deployment is easy. The platform ensures minimal disruption of activities, supports GPO, SCCM or any other software inventory solution for seamless push installation
• User-friendly dashboard provides a unified workflow towards the resolution of incidents

Automated Reports

• Reports are automatically generated and management-ready
• Reports provide clear visibility on infrastructure and capture noteworthy activity

Cloud Scanning

• Metadata relating to any incident is cross-checked against ReaQta's cloud for a severity impact score.
• Uncover potential threats before the real attack begins.

Customizable Detection Strategies

• Flexibility to customize the engine to detect every threat scenario – whatever, whenever.
• Create your own response and remediation playbooks to suit your company's needs

SUPPORTED ARCHITECTURES

INFO@REAQTA.COM VISIT REAQTA.COM

ReaQta was founded by an elite team of offensive and defensive cyber security experts as well as machine learning researchers. Combining these varied expertise, our team has built a powerful Active Defense Intelligence Platform. Our solution provide clients with advanced detection and response capabilities, without requiring additional or highly skilled personnel. This innovative approach applies the latest A.I. algorithms to automate and simplify the process of detecting and handling new threats.

Andere tools die uw organisatie weerbaarder maken

ProteQtor IT Security is niet alleen reseller partner van ReaQta, maar biedt nog meer cybersecurity tools aan om uw organisatie zo weerbaar mogelijk te maken.

Hieronder tools die wellicht interessant zijn ter bescherming van uw organisatie:

- Beveilig uw e-mail met **Proofpoint email security**
- Train uw medewerkers met laagdrempelige **Wizer security awareness trainingen**
- Bescherm het inloggen met **Watchguard Authpoint multi-factor authenticatie**
- Voorkom bezoeken aan ongewenste websites met **NSOC360 Safeweb webfiltering**
- Krijg inzicht in de veiligheid van uw netwerk met **Guardian360 scans**
- Herstel verloren data met **NSOC360 Safedata online backup**

Laat hackers uw bedrijfscontinuïteit niet in gevaar brengen!

Cyberaanvallen bedreigen privacy, bedrijfskritische data, de reputatie en andere 'kroonjuwelen' die cruciaal zijn voor de continuïteit van uw organisatie. De vraag is allang niet meer 'of' uw organisatie aangevallen wordt, maar 'wanneer' uw organisatie (weer) aangevallen wordt. Het is essentieel om cyberaanvallen te voorkomen en de gevolgen van cyberaanvallen tot een minimum te beperken. Het feit dat u deze pdf leest, toont dat u dat belang inziet.

Vanwege de grootte, de complexiteit en de diversiteit van moderne cyberaanvallen is een multidisciplinaire aanpak nodig. We helpen u graag met praktische adviezen en effectieve oplossingen om deze aanpak te realiseren.

Met de juiste trainingen, tools en support helpen wij u hackers het hoofd te bieden en er voor te zorgen dat alles wat voor uw organisatie van waarde is, beschermd blijft.
